新型棉棵分离机广泛用于棉区农村,是一项将棉花与棉壳分离的农用机械设备。解决了多年以来棉农人工分离棉花与棉壳的繁重工作,既省时省力又减少了因雨季而带给棉农的不应有的经济损失。该机结构简单,使用方便,耗电量少。分大、中、小型三种设备,适用于农场、乡村及家庭。该项目投资少见效快,应用广泛,市场前景好,欲寻求转让。

新型脚踏式控水阀

本项目设计合理,使用方便,经过精密加工成为薄型控水阀。既美观又方便,人们用脚一踩就出水,脚松既停。市场上现有的脚踏式控水阀因其尺寸偏大而在安装及使用上受到相应限制,感应式控水阀因其价钱较贵,安装较复杂,又因其以电为动能因而受到环境的限制,难以推广。本项目特点是:结构简单,地面任何位置皆可安装,维修方便,不用电。且容易推广,有供水地方都可应用,可在车站、码头、医院、学校、饭店等公共场所使用。制造成本低,加工方便。

电喷车气体燃料电子喷射供给和自动

该项目是一种用于燃气电喷车(单燃料)和汽油—燃气电喷车(两用燃料)的气体燃料电子喷射供给

和自动调节的燃料供给系统,它是在原来用油的汽车上增加一套供气系统,并保留原供油系统,使改装后的车既能跟以前一样用油,又能用气。它包括储气瓶、减压调节器、电子燃气喷嘴、电子调节器等组成,本项目解决了电喷车直接喷射气体燃料,并利用原车的“ECU”对气体燃料进行喷射控制的问题,从而达到了减少能耗,降低尾气污染,提高效率,降低成本,并适合多种车型使用的目的。该项目寻资金。

一种灯具寻合作伙伴

本项目特点是在灯体前部设有透镜,透镜上分布有金字塔状棱镜,该灯具可以通过棱镜让光线发生偏折,把单个人工光源中间高光能分布的一部分有效地让其偏折到边缘光能相对薄弱的区域,对光能照度的分布起到了调整的效果,从而提高了照明度的均匀性。该灯具设置的透镜,可以有效过滤灯光线中的紫外线(250-400nm)成分,在台灯距离人眼处(20cm)其接受的紫外光含量小于8uw/平方厘米,超过先进国家制定的标准,符合绿色照明条件。

“燃煤气化环保锅炉”“燃煤气化锅炉”招商

这两个项目解决传统锅炉难以解决的烟尘污染,浪费能源等问题,使烟煤强化燃烧,完全燃烧,无黑烟排放,热效率高,比燃油、燃气和改烧无烟煤的锅炉易管理,成本低,安全经济运行,环保节能效果好,是传统锅炉的更新换代产品,开发前景广阔持久。同时本人还有燃煤气化工业炉窑和燃烧设备烟气净化器项目,以上四项全是环保节能技术,已获得国家专利。

一种双层真空汽车风挡及车窗玻璃寻求合作

本项目是根据热传递原理,有效避免传导、对流、辐射的发生,它有以下特点:防止冬天上霜、夏天上蒸汽,提高驾驶安全,节约能源、降低车内噪音、增强防撞能力、提高保温能力,达到节约燃料等。一种借助风力辅助吹干的甩干机项目是根据有风蒸发的快的物理学原理,在原甩干机上增加高速的吹风机向甩干桶内助风,在甩干桶底部开排风口,使被甩干物品干的更快、更好等特点。

卷曲辊简介

年产3万吨,年产5万吨涤纶生产线,由国外引进其主机之一卷曲机上的关键部件一卷曲辊(罗拉),表面纺丝工艺需要加热80°C-90°C。与国外热水系统设计为一体。我公司改进设计:把一体设计改为两体结构,它由卷曲轴和卷曲辊组成。这种水加热系统设计缺点:

1. 设计结构复杂、加工难度大、成本高。
2. 热处理工艺难度大,因结构复杂易产生裂纹,报废损失大。
3. 结构简单,工艺性好,成本低,为进口价的五分之一。
4. 卷曲轴采用价格低的不锈钢,卷曲报废损失较小。

带有镜子的手机寻求合作伙伴

通过在背部增设镜子的方法为手机增设了一项新功能,是对镜子功能和手机功能的组合和创新。国内从事手机供应的生产商近四十家,市场竞争非常激烈,谁能真正理解市场,谁就能成为赢家。与市场上其它具有镜子功能的手机相比,该专利具有以下优点和特色:

镜面大,功能好、生命力强,产品的外延性强,时尚感强烈、生产成本低廉。由于只是采用几种简单的部件,它的制作工艺非常简单、成熟,因此成本非常低廉,厂家只需要对设备进行简单的改进,即可以生产。与其它涉及镜子的手机专利相比,该专利具有以下优点和特色:抗震性好、镜面大、镜面保护性强。

微型电灯遥控器

设计者多年从事电子产品设计,本产品是专门针对家庭电灯遥控的具体情况和需要而设计的普及型产品。本产品元件数量极少,功能较为完善。安装简单使用方便,可制成钥匙牌或极小饰品随身携带。本产品可有效延长白炽灯使用寿命。成本低廉,市场前景广阔,批量生产成本更低。

Electronic children's vehicle

This children's vehicle can be served as common children handcart, and also have electronic cradle bed, it's an multi-function children handcart which combined with electronic wave chair and children handcart. no need to use manpower. adjust it's function wanton. Convenience to fold Easy to carry, this children's vehicle have fast and slow two gearing the rate changing function. Timing machine. and the chair will recover to the original place after cut the electricity off. it's manufacture technology are in the leading position among the existent children's vehicle, for fully realize this products's social value and economy value, this project asking for co-operation in all ways.

The new cotton shell separate machine

This new cotton shell separate machine are widely used in the cotton rural areas, it is peasant using mechanical equipment. and solve the heavy works for cotton shell separation which done by humans in past a lot of years. not only saving time and strength but also reduce the unavaliabele economy lost bring by rainy season. This machine has simple structure. convenient for using. and lower electricity consumption. it's type have big middle and small three equipments, fit for the farm, rural area and home, this project has less investment get effect fast characteristic, widely used, have a good market prospect, want to transfer to others.

The new-type pedal foot water control valve

This project reasonable in design , easy to use, accurate manufacture become to slim water control valve. Beautiful and convenient,when people pedal with foot the water will out. when people stopped the water will also stopped. Market existing water control valve restrain from to use because its size is large in installation and using, reaction type pedal water control valve because relatively expensive in price , install relatively complicated, because it regard electricity as kinetic energy limit by environment again, difficult to popularize. This project characteristic is; simple structure, maintain convenient in any ground position for install , do not use electric And easy to popularize, can be used in water supplying place,and also can be used in some public places such as the station , quay , hospital , school , hotel ,etc.. with low costs in manufacturing, processing is convenient

Electricity gush out car gaseous fuel electron and supply with with automatic device project seeking fund

This project are using for gas cable electricity gush out train (single fuel), and petrol - gas electricity gush out gaseous fuel electron car (dual-purpose fuel)and supply with the automatic fuel supplying system, it was increasing a set of air supply system with the automobile of the oil originally, kept the former oil supply system, the refit car can not only use the oil as before but also can use gas. It includes gas storing cylinder, pressure reducing regulator , electronic gas spray nozzle , electronic regulator ,etc. , this project solve electricity gush out car spray gaseous fuel directly , utilize original question for“ ECU ” of car controlled to spray gaseous fuel, thus reducing the energy consumption , and the tail gas pollution , raise the efficiency, lower costs , and the purpose suitable for many kinds of style to use.

A kind of lamps seek the cooperative partner

This project characteristic is have lens in light

in front of body part, prism of the Pyramid shape are distribute in the lens, this lamps can be simply rolled over the light through the prism, reach the result of light energy Intensity of illumination distribution, thus improved the homogeneity of the illumination. this lamps have lens, can filter the composition of ultraviolet ray (250-400nm) in the light line effectively , from the human eye place (20cm) from the desk lamp, the ultraviolet ray accepted is smaller than 8uw / square centimetre, exceed the standard that the advanced country makes . Accord with the green lighting condition .

The coal fire gas environmental protection boiler and “ the coal fire gas boiler ” and asking for investment

These two project solve smoke and dust pollution in traditional boiler ,waste energy question etc. , make the bituminous coal strengthen and burn, totally burn, there is not black smoke discharged, being high thermal efficiency , easy to manage than boiler to boil the anthracite fuel gas, fuel oil, with low costs, safe economical operation, environmental protection is effectual in energy-conservation, it is the update products of the traditional boiler, have a bright future to develop and also can be last for a long time. At the same time I still have coal fire stove cellar of chemical industry and burn equipment the exhaust gas purification device project ,the above four items are all power-saving and environmental protection technologies, have already obtained the national patent.

One double-deck vacuum automobile windscreen and train windowpane seek cooperation

This project according to hot transmit principle, avoiding emergence , convection of radiation from been happened effectively, it has the following characteristic; prevent the frost in winter, and the steam in summer,improve drive safety, saving energy,reduce the noise in the car , strengthen anti-bump ability , raising warm keeping ability, and can reach the aim of fuel saving etc.. a kind of dry up project through wind-force are according to windy evaporation fast physics principle,

and also increase high-speed hair-dryer blow adoptive wind into the dry barrel, and open a ventilation hole in the bottom of dry barrel, and make dry easier for dry up things, more good characteristic.

Brief introduction of curly roller

Produce 30,000 tons per year, and also produce 50,000 tons of dacron production line per year, import from foreign countries one of key part one curly roller (Laura) surface spinning craft must heat to 80-90 °. And same to the designing of foreign hot water system. Our company improves designing: change one whole design into two body structure, it composed of curly axle and curly roller. The shortcoming of this kind of water heating system:

1. The project structure is complicated, difficulty in manufacture, with high costs.
2. Heat treatment craft is very difficult, because structure is so complicated and easy to produce crackle, scrap disastrously.
3. simple structure, the craft is good, with low costs, only occupy 1/5 of import price.
4. Curly axle adopt lower price stainless steel, very lower in curly scrap.

With mirror cell-phone seek the cooperative partner

Through setting a mirror at the back of the cell-phone and increase a new function to it, it is combination and innovation of the function of the mirror and cell-phone. Nearly 40 manufacturers engaged in the cell-phone supply inside China, market competition is very fierce, who can really understand the market, who can become the winner. Compared with other mirror cell-phones function in the market, this patent has the following advantage and characteristic:

The surface of the mirror is large, the function is good, the vitality is strong, the ductility of this products is strong, the fashion sense is good, the production cost is cheap. Because only adopt several kinds of simple parts, its making technology is very simple, so the cost is very cheap, the producer only needs make some simple improvement to the equipment, then can produce. Com-

pared with other patents of cell-phone which related mirror, this patent has the following advantage and characteristic: good ruggedized, the surface of the mirror is large, the protection properties of surface of the mirror is.

The most new-type bicycle

"most new-type bicycle" is one kind of inside transmission bicycles with two wheels, have 5 type in all, and protect inside transmission bicycle closely. The originally traditional bicycle was putting, when the chain was too tight and can not to ride, if rides hard the nut in the left will become flexible, only can exert 2/3 of the strength which you have used, heavy and hard, when go up a slope and Against the wind can not ride, it is apt to lose the chain, but inside transmission bicycle, have strong explosive force against the wind and go up a slope, and the frame is durable, most suitable for the mountain region, the west and countryside to ride, certainly the city needs even more.

Remote controller of miniature electric light

Designer engaged in electronic product design for many years, this is a popular products specially design to family electric light of remote control detail conditions and needs. there are few elements of product, the function is comparatively perfect. Install simple user-friendliness, and also can make into key card or the accessory fitted for hand-carried. This product very effective extension in-candescent lamp service life. The cost is low, the market has a bright future, the production cost of the batch is lower.
